

## Faculty Position Available

### Department of Chemical and Biomolecular Engineering North Carolina State University

The Department of Chemical and Biomolecular Engineering at NC State University seeks highly qualified candidates for a tenure-track faculty position in chemical engineering in the area of separation science/technology with a focus on bioseparations. The Department is partnering with the Biomanufacturing Training and Education Center (BTEC) in the College of Engineering to provide a unique opportunity for a qualified candidate. We will consider candidates who possess a Ph.D. (or equivalent) degree in chemical engineering or related discipline.

The successful candidate is expected to establish a vigorous and scholarly research program of international reputation, advise PhD students, and teach undergraduate and graduate chemical engineering courses, some of which are co-listed with BTEC. BTEC can make available numerous opportunities to leverage the successful candidate's research and educational programs with equipment, staff expertise, and contacts with the biopharmaceutical industry. Top priority is given to candidates who demonstrate excellence in scholarship regardless of research interests within the area of bioseparations.

Candidates will be considered at all levels, from Assistant Professor to Full Professor.

Please apply for the position at the NC State University web site <https://jobs.ncsu.edu/> and search for position #531. For additional information, you may contact the Search Committee Chair: Professor H. Henry Lamb, Department of Chemical and Biomolecular Engineering, Campus Box 7905, North Carolina State University, Raleigh, NC 27695-7905, or [lamb@ncsu.edu](mailto:lamb@ncsu.edu), or 919-515-6395. For ADA accommodations, contact Ms. Angela Efimenko: [aefimen@ncsu.edu](mailto:aefimen@ncsu.edu), or 919-515-4251.
