

University at Buffalo
The State University of New York

Department of Chemical and Biological Engineering
School of Engineering and Applied Sciences

The Department of Chemical and Biological Engineering (CBE) at the University at Buffalo (UB) seeks to hire multiple faculty members at all ranks. The existing department faculty has strengths in stem cell engineering, gene and drug delivery, vaccine engineering, protein engineering, immuno-engineering, and tissue engineering and regenerative medicine. Among our strategic goals is to build our expertise in systems-level computational or experimental studies related to bioengineering research with applications in biopharmaceuticals, synthetic biology, biomedicine including regenerative medicine, environment and related fields. However, excellent candidates in all areas will be considered. We are particularly looking for candidates who can operate effectively in a diverse community of students and faculty, and share our vision of helping all constituents reach their full potential.

Candidates are expected to complement existing research strengths in the department (www.cbe.buffalo.edu), the School of Engineering and Applied Sciences (SEAS; engineering.buffalo.edu), the Jacobs School of Medicine and Biomedical Sciences (medicine.buffalo.edu), the NYS Center of Excellence in Bioinformatics and Life Sciences (www.buffalo.edu/bioinformatics.html) and / or the Institute for Research and Education in eNergy, Environment and Water (RENEW).

Applicants should submit a curriculum vita, statements of teaching and research plans, and three references via the UBJobs system (www.ubjobs.buffalo.edu, reference posting number 1600768). Applications received by December 1, 2016 will be given priority but review of applications will continue until the positions are filled.

UB CBE combines excellence and collegiality to provide an outstanding environment for our faculty, staff and students. UB CBE was ranked 8th in the nation for publications per faculty; and 9th for awards per faculty (National Research Council, 2010). Areas of research strength and focus in the department include bioengineering, nanomaterials engineering, and molecular and multiscale modeling. At present, we have 23 faculty members with over \$350K of annual research expenditures per faculty, 130 graduate and over 330 undergraduate students. Our faculty includes three members of the National Academy of Engineering, a National Medal of Science awardee, eight NSF CAREER Award winners, and several Fellows of professional societies. Over the next five years we anticipate continuous growth that is supported by university-wide strategic plans for growth in energy research, nanotechnology, materials research, bioengineering, and related areas where CBE plays a key role.

Along with a strong core of bioengineering and materials science and engineering faculty in CBE and the School of Engineering and Applied Sciences, UB offers rich collaborative opportunities in the Schools of Medicine, Pharmacy, Arts and Sciences, the Center for Excellence in Bioinformatics and Life Sciences, Hauptman-Woodward Medical Research Institute, Roswell Park Cancer Institute, the new Center of Excellence in Materials Informatics (CMI) and RENEW (Research and Education in eNergy, Environment and Water).

The University at Buffalo is the largest and most comprehensive university in The State University of New York (SUNY) system, with about 19,000 undergraduates, 10,000 graduate students, and 1600 full-time faculty (which is expected to grow by 300 faculty over the next five years). Buffalo is a city with a rapidly growing economy, eclectic neighborhoods, world-class art galleries and museums, a vibrant theater and music community, the Lake Erie waterfront, a city-wide system of parks designed by renowned landscape architect Frederick Law Olmsted, and major and minor league sports teams. The awe-inspiring Niagara Falls is just 20 minutes away. CBE is located on the UB North Campus in suburban Amherst, an area that combines outstanding public schools and services with a surprisingly low cost-of-living.

The University at Buffalo is an Equal Opportunity/Affirmative Action Employer/Recruiter.
