

**NC STATE UNIVERSITY**

## **TENURE-TRACK FACULTY POSITION**

### **Energy**

Department of Chemical and Biomolecular Engineering  
North Carolina State University

The Department of Chemical and Biomolecular Engineering at NC State University seeks highly qualified candidates for a tenure-track faculty position in chemical engineering with a focus on energy science and technology.

The term “energy science and technology” is interpreted broadly, including but not restricted to catalysis, electro- and/or photoelectrochemistry, and nanoscale materials and processes. Energy research requires multidisciplinary involvement, and we will consider candidates’ potential for working within interdisciplinary initiatives and developing new ones.

Candidates will be considered at all levels, from Assistant Professor to Full Professor. We will consider candidates who possess a Ph.D. (or equivalent) degree in chemical engineering or a related discipline. Top priority is given to candidates who demonstrate excellence in scholarship, regardless of research interests within the areas of energy. The successful candidate is expected to establish a vigorous and scholarly research programs of international reputation, to teach undergraduate and graduate departmental courses, and to contribute to departmental, college, and university activities.

Please apply by visiting the NC State University web site, <http://jobs.ncsu.edu>, and searching for position #531. NC State University is an Equal Opportunity, Affirmative Action employer. For additional information, you may contact:
