

University of Michigan
Department of Chemical Engineering

The Department of Chemical Engineering seeks highly qualified applicants for tenure-track or tenured positions at all levels. Applicants should have a PhD in chemical engineering or a related field, a track record of outstanding research, and a commitment to excellence in education and student mentoring. We seek qualified applicants from all areas of chemical engineering and related fields, including the emerging areas of data science and machine learning, nanomanufacturing and molecular engineering, engineered matter and bio-inspired systems, as well as fields of science and engineering related to energy and sustainability.

The University of Michigan is the top ranked public university in the US, and ranks among the top universities worldwide. The UM College of Engineering is ranked in the top 5 of all engineering schools in the country. Ann Arbor was recently voted “the best city to live in,” and is less than 30 minutes from Detroit Airport. Ann Arbor features a diverse and international population, and offers a broad range of cultural opportunities, outdoor attractions and world-class dining.

The College of Engineering is especially interested in candidates who can contribute, through their research, teaching and/or service, to the diversity and excellence of the academic community.

Candidates should complete the on-line application at <https://che.engin.umich.edu/about/faculty-search/>.

The University of Michigan is an equal opportunity/affirmative action employer.
