

The University of Texas at Austin
McKetta Department
of Chemical Engineering
Cockrell School of Engineering

FACULTY RECRUITING IN CHEMICAL ENGINEERING—THE UNIVERSITY OF TEXAS AT AUSTIN. The McKetta Department of Chemical Engineering seeks outstanding applicants for a senior faculty position at the level of Professor, although outstanding applicants for junior faculty positions will also be considered. Applicants at the level of Professor must have an exemplary record of sponsored research, undergraduate and graduate teaching, and service. The areas of focus are design and manufacture of materials for energy and biological engineering for therapy, diagnostics, and renewable chemistries. Applications from women and minorities are especially encouraged. A successful candidate is expected to teach chemical engineering undergraduate and graduate courses, direct an internationally recognized sponsored research program, collaborate with other faculty, and participate actively in service to the university and the profession. A Ph.D. in chemical engineering or related field is required.

Interested persons should submit in *electronic form as a single PDF document* a detailed curriculum vitae including academic and professional experience, statements regarding their teaching philosophy and research plans, a list of peer-reviewed publications and other technical papers. Applicants should also provide the names, address and telephone numbers of five or more references. The online application form can be found at <http://www.che.utexas.edu/facultyapplication>. Please apply by November 23, 2015 for primary consideration; however the position will remain open until filled. A security sensitive background check will be conducted on selected applicants. The University of Texas is an Equal Opportunity/Affirmative Action Employer.
